CAREER OBJECTIVE

Motivated and detail-oriented graduate seeking an entry level position where I can apply my academic knowledge, develop my professional skills, and grow within a dynamic team.

EDUCATION

Andhra University – Gayatri Vidya Parishad College

Bachelor of Computer Applications (Data Science) – 8.81/10 2022–2025

Sri Vasavi Junior College

Board of Intermediate Education AP– 9.18/10 2017–2019

Vijayam School

CBSE – 10/10 2017

PROJECT

Air Quality Index Prediction and its Adverse Effects on Human Health using Machine Learning

Technologies: Machine Learning, Data Collection, Python, Pandas, Numpy, Scikit-learn, XGBoost, Matplotlib, Seaborn, PyQt5

- Initiated and implemented Machine Learning models for training and testing to predict the Air Quality Index(AQI).
- Conducted through surveys to gather precise data on air quality for model training and optimization.
- Successfully completed the project, presenting findings and solutions during the required academic Viva.

Image Caption Generator using Machine Learning

Technologies: Python, TensorFlow, Keras, CNN, LSTM, Natural Language Processing

- Designed and built an Encoder – Decoder deep learning architecture to automatically generate natural language descriptions for input images.
- Implemented Convolutional Neural Network for feature extraction and a LSTM-based Recurrent Neural Network to serve as the decoder/Language Model.
- Managed the entire ML pipeline, including image processing, text tokenization, model training on the dataset, and generated captions.

Portfolio

Technologies: React.js, HTML5, CSS3, Responsive Design GitHub Pages

- Developed and deployed a personal portfolio website from scratch using React.js to showcase technical projects and skills.
- Implemented responsive design principles to ensure a seamless and accessible user experience across both desktop and mobile devices.
- Managed project version control with Git and deployed the live application using GitHub pages.

SKILLS

Programming: Python, C-Programming, R, SQL, Java.

Big Data: Hadoop, Spark, Hive, and Data Warehousing solutions

Machine Learning and AI: TensorFlow, Keras, PyTorch, CNN, Natural Language Processing

Data Visualization: Tableau, PowerBI, Seaborn, Matplotlib, SPSS

Web Development: React.js, HTML, CSS, JavaScript

INTERNSHIPS AND CERTIFICATIONS

- Certification on the completion of Internship on MERN Stack by CSC India. April-June
- Certification on the completion of Internship on Python at Data Pro Institution. May-July
- Certificate of participation in IOT workshop by Teckybot.
- Certificate of participation in 3-D printing workshop by Teckybot.
- Programming for everybody (Python) – University of Michigan
- Python for Data Science - IBM Developer Skills Network
- Machine Learning Certificate by Reliance Foundation | Skilling Academy

ACHIEVEMENTS

- Coordinated a major campus wellness initiative for 500 participants, successfully promoting physical and mental well-being among the student community.
- Facilitated an impactful “Clean Swachh Bharat” workshop, raising crucial environmental awareness and promoting sustainability principles for 200 college students.
- Conducted extensive community surveys and comprehensive documentation for a 2024 project analysing the environmental effects of plastic pollution.

SOFT SKILLS

Self-motivated | Quick Learner | Team player | Leader | Communication skills | Responsibility | Flexible

EXTRA-CURRICULAR ACTIVITIES

- Participating in coding competition at college
- Enthusiastic cricket player at school level.
- Watching Movies and Reading Books to enhance my visual skills.
